

# CASE STUDY:

## RETURN ON INVESTMENT

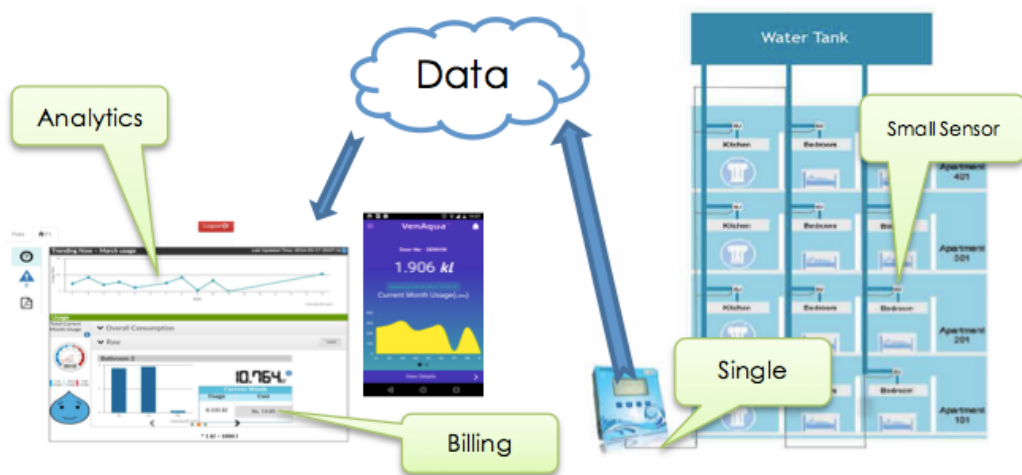

### HOMEOWNERS ASSOCIATION

Appaswamy Cityside Homeowners Association faced varied problems with respect to water mainly concerning the spiraling maintenance costs and increased conflict among residents. They were looking for a solution that provided data on water usage to reduce conflicts as well as insights to reduce the price paid for water.

Cityside consists of 136 apartments – a mixture of 2 BKHs, 3 BKHs, penthouses and a swimming pool.

### Our Solution

After the installation of VenAqua at Cityside, the total cost of water per month reduced by approximately **INR 2 lakhs**. The homeowners of Cityside saw a return on their investment in less than **12 months!**

When a resident left a tap open on 4th July when away from home, the alarm triggered by VenAqua system saved at least 11k liters (~1 Tanker Lorry)!

A before and after installation of VenAqua System details the steady reduction in water usage on a month on month basis for the site. VenAqua was installed in May, 2016
